

# STREAM

Dr. Davis

## DECEMBER HIGHLIGHTS

This December we encountered algorithms, debugging, sequencing, sprites and behaviors as we met challenges involved in learning how to code. We are using a drag and drop programming language called Blockly. The version we are learning has javascript at its core. Students are also practicing keyboarding, another essential skill for digital designers.

We wrap up our time together by borrowing books and learning fun facts from the worlds of Science, Technology, Engineering, and Math (STEM). A few of the questions we explored and then discussed are listed to the right. [→](#)

## CONVERSATION

### STARTERS

COULD A KID WIN A RACE  
AGAINST A PENGUIN?

HOW DO POLAR ANIMALS  
SURVIVE THE COLD?

ARE MERMAIDS REAL?
